Smart-Flex Sanding Systems

Smart-Flex is the most flexible and advanced brush sanding system for a wide range of tasks in modern wood-working.

Flexible finger abrasive strips are slotted into grooved cores. The sanding strips come in a wide variety of different lengths, cutting widths and grit sizes.

Additional support brushes for more sanding pressure or special cotton or leather strips can be combined to achieve the best possible sanding finish. There are over 1,000 different possibilities to create a tailor made head for sanding and denibbing.

The Smart-Flex system is very economical as only the sanding strips need to be replaced. With the split end cap option, the sanding strips can

be changed in minutes without removing the head from the machine. This means even shorter machine down time.

Highlights of the Smart-Flex System

- Smoothens sharp edges
 - Removes fibers and scuffs
 - Creates a uniform and improved surface finish
 - Suitable for sanding wood, MDF and all types of coatings, including UV
- Reduces coating consumption
 - Two versions of sanding strips available, the MULTI series and the ECO series
 - Heads (cores) available with straight or spiral keyways

- Optional split end caps on the head allows removal of the sanding strips while the head is on still on the machine
- Can be custom made to fit existing machines

Sanding Strips are available in two series:

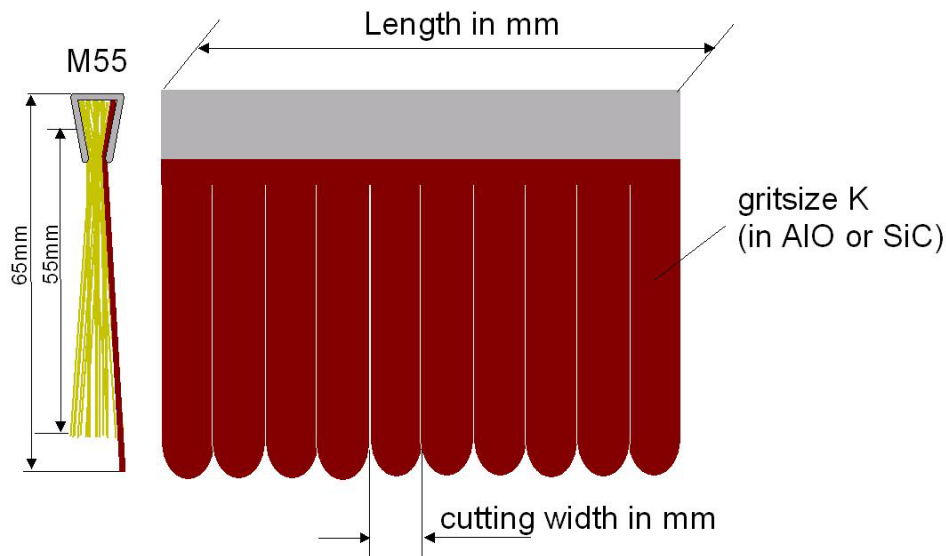

Multi Series:

Prices in US Dollar per each piece, ready, cut to length

Available grit sizes: K 60, 80, 100, 120, 150, 180, 220, 280, 320, 400 and 600. Other grit sizes available upon request.

abrasive: Aluminium Oxide (AlO) oder Silicon Carbide (SiC). Other abrasives available upon request. If not specifically ordered we usually deliver gritsizes up to K180 in AlO and gritsizes K220 and finer in SiC.

Possible cuttings: appr. 3mm, 4mm, 7mm or 20mm.

Please specify with your order:

quantity, Type:(i.e. M 45) / length in mm (i.e.150), gritsize: (i.e. K 220), cutting width: (i.e.-7mm), abrasive: (S for SiC or A for AlO)

Example: 50 pieces sanding strip M45 / 150 K 220-7 S

All prices are in US Dollars, ex works and do not include costs for packaging, transport or insurance. With this issue, all prior price lists are rendered invalid. We reserve the right to make technical changes. All deliveries will be performed according to our terms of sale and delivery. Effective April 1, 2008

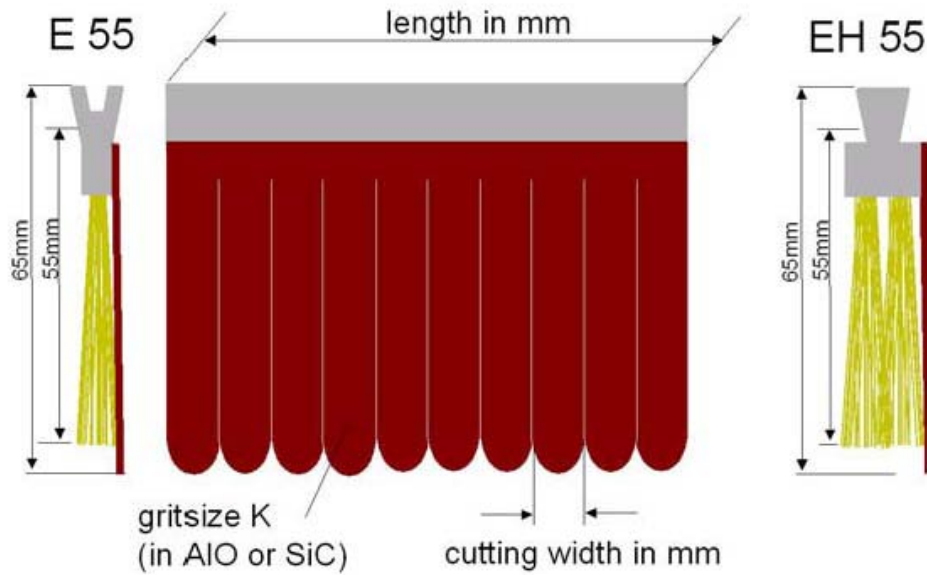

Eco Series:

Prices in US Dollar per each piece, ready, cut to length

Available grit sizes: K 60, 80, 100, 120, 150, 180, 220, 280, 320, 400 and 600. Other grit sizes available upon request.

abrasive: Aluminium Oxide (AlO) oder Silicon Carbide (SiC). Other abrasives available upon request. If not specifically ordered we usually deliver gritsizes up to K180 in AlO and gritsizes K220 and finer in SiC.

Possible cuttings: appr. 3mm, 4mm, 7mm or 20mm.

Please specify with your order:
quantity, Type:(i.e. E 45) / length in mm (i.e.150), gritsize: (i.e. K 220), cutting width: (i.e.-7mm), abrasive: (S for SiC or A for AlO)

Example: 50 pieces sanding strip E45 / 150 K 220-7 S

All prices are in US Dollars, ex works and do not include costs for packaging, transport or insurance. With this issue, all prior price lists are rendered invalid.
